SUMMARY

Prefinal B.Tech Computer Science student with expertise in Python, C++, AI/ML, Django, FastAPI, and Cloud Computing. Experienced in developing AI-powered chatbots, automation solutions, and web applications. Google Cloud certified (5+) with a strong interest in Generative AI, backend development, and scalable software systems.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

2023 – 2027

JECRC University, Jaipur, Rajasthan

SKILLS

Technical Skills:

Programming Languages: C++, Python, Java, SQL

AI/ML Concepts: Artificial Intelligence, Machine Learning, Deep Learning, Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), Agentic AI

Frameworks & Platforms: Django, FastAPI, TensorFlow, LangChain, LangGraph, Google Cloud Platform (GCP)

Tools & APIs: Git, GitHub, Google Gemini API, OpenAI API, Fireworks AI, Perplexity AI, REST APIs

Soft Skills: Communication Skills, Team Collaboration & Leadership, Problem Solving & Critical Thinking

EXPERIENCE

AI & Web Development Intern | UDAAN Society

July 2026 – Present

- Developed a **FastAPI-based AI chatbot backend** and integrated **UDAAN Saathi** into the NGO's website using **FastAPI, Django, and Google Gemini API**.
- Built a **Retrieval-Augmented Generation (RAG)** pipeline with a structured knowledge base to deliver accurate, context-aware responses about blood donation, volunteering, donations, and NGO services.
- Designed and integrated **RESTful APIs** for seamless communication between the Django frontend and FastAPI backend, improving scalability and maintainability.

Tech Stack: Python, Django, FastAPI, Google Gemini API, REST APIs, SQLite, Git, GitHub

PROJECTS

RIVA – Responsive Intelligent Virtual Assistant | Python, OpenRouter API, AI | [Project Link](#)

[April 2026]

- Developed an AI-powered voice assistant inspired by JARVIS/FRIDAY for voice-based automation..
- Built wake-word detection, speech recognition, AI responses (OpenRouter), text-to-speech, web automation, music playback, and weather/news API integration using Python.
- Successfully developed a functional voice assistant capable of real-time interaction, automation, and intelligent responses while gaining hands-on experience in AI integration, APIs, and asynchronous programming.

Driver Drowsiness Detection and Alert System | Python, OpenCV, MediaPipe

[Ongoing]

- Build a real-time AI-based system to detect driver drowsiness and alert the driver instantly.
- Developed a Driver Drowsiness Detection System using Python, OpenCV, and MediaPipe with facial landmark detection and Eye Aspect Ratio (EAR) analysis for eye-blink and fatigue monitoring. Integrated real-time webcam processing and alarm alerts for drowsiness detection.
- Successfully created a real-time computer vision system capable of detecting driver fatigue accurately and providing instant alerts to improve road safety.

CERTIFICATIONS

[Tata – Gen AI Powered Data Analytics Job Simulation](#)

[Feb 2026]

[Deloitte – Technology Job Simulation](#)

[July 2025]

[Google Cloud Computing Foundations: Data, ML, and AI in Google Cloud](#)

[Oct 2023]

ACHIEVEMENTS & ACTIVITIES

- Completed 5 professional certifications in Google Cloud Platform and AI/ML technologies
- Active contributor to open-source projects on GitHub with focus on cloud and ML solutions
- Participated in Smart India Hackathon
